ANOTHER HAPPY CUSTOMER FOR iWMS AMERICAS

Prior Lake, MN, January 12, 2016 – Prior Lake Technology Village Business Accelerator participant business, iWMS Americas, was able to ‘follow the sun’ and deliver on another successful implementation project. iWMS Americas is a software development, consulting and IT staffing company that is able to take advantage of the time zone differences by utilizing offshore and North American resources to work around the clock and provide cost effective solutions for their clients. Here is what another happy customer had to say...

WHAT CUSTOMERS HAVE SAID?

"I was skeptical to use offshore resources on my client's HighJump Warehouse Advantage implementation, however, iWMS's offshore developers broke the mold. Once they got involved they got ramped up quickly and provided value during development from start to finish, delivering quality and responding quickly to our requests."

Ryan Kirklewski,
Vice President, Consulting Services
Accelogix

iWMS Americas is an international software service provider operating out of the Technology Village Business Accelerator in Prior Lake, Minnesota. iWMS Americas is the American extension of iWMS Global whose head office is in South Africa. iWMS also operates in Bangalore, India through iWMS India. The combination of iWMS South Africa, iWMS Americas and iWMS India expands delivery capabilities across the world. It allows iWMS to blend teams to make sure the right level of experience is allocated to each project, with the right onsite-offshore mix, while keeping overall delivery costs low.
